

QA Coding Challenge v1

Requirements:

- Use Selenium or Cypress
- Create an automated test project that takes the following steps
 1. go to the booking main page (<https://www.booking.com>)
 2. Where it says 'Where are you going', enter 'Porto'
 3. Check-in: 1st of the next month
 4. Check-out: 7th of the next month
 5. Click on Search
 6. Print total number of properties found on the console
 7. Verify the Check-in date on the left is the 1st of next month
 8. Verify the Check-out date on the left is the 7th of next month
 9. Print the names of the properties found on this first page
- Create a readme and describe
 - the decisions taken
 - how to run the tests
- No restrictions on the dependencies that you want to use.
- When you're finished, share the result by email in a zip or with an invitation to a private repository in Github or similar.
